PRIMEX TELECOM
Product Specification Sheet

1. PRODUCT SUMMARY

The Primex Verge P4200 WiFi transparent Media Distribution Enclosure for structured wiring brings reliability when managing today's inside cable system requirements. Its flexible design provides a convenient, lockable and centralized location for easy installation and distribution of multi-play services within residential and commercial premises.
2. PRODUCT DIMENSIONS

Inside H 42"/ W: 14"/ D: 3.5"

3. FEATURES & BENEFITS

- Patent-pending, modular design provides simple scalability for a variety of space requirements.

- WiFi transparent plastic delivers up to 15x more wireless signal strength than metal alternatives.

- Install and distribute multi-play services easily from one convenient and centralized location.

- Eliminate interference with equipment such as a router's wireless signal with ABS polymer construction.

- Easy installation and transportation with the lightweight design.

- Multiple entry/exit knockouts on the sides, top, and bottom make them completely adaptable.

- Compatible, Universal Mounting Plate makes configuration fast and easy.

- Assure safety and durability with UL safety standard compliance, ABS Flame Retardent Polymer.

- These enclosures should not be installed in a fire rated wall as they are not fire rated.
