

Product Data Sheet: Copper Patch Cords

Applications

- Telecommunications
- •CATV
- •LAN & WAN
- Broadband
- •FTTP

Features and Benefits

- •All cables tested to industry standards
- Available in both straight or crossover pinning
- •Lifetime Warranty
- •Custom colors and lengths available upon request

Description

Wirewerks' copper patch cords are available in category 5E, category 6, and cross-over configurations. Wirewerks is one of only a few suppliers to fully test each and every patch cord for correct continuity, NEXT, and reflection loss within TIA requirements. They are 4 pair 24 AWG stranded (Cat6) cables with snag-less molded connectors and integral strain

relief. Pins are plated with 50um of gold. The bandwidth of these products is 350 MHz.
